GRADUATE RESEARCHER (MS / PH.D.)

Feb 2015 – March 2021 (Expected)

- Advisor: Gunhee Kim
- **Multimodal info Retrieval.** Developed methods for retrieving a corresponding movie-review blog(text and image, video contents). Also developed video retrieval from natural language sentence query. *Won LSMDC (2016,2017) challenge*
- **Visual Summarization.** Implemented Multi-channel ego-centric video summarization for industrial project. I also have experience of leading projects about deep ranking model for 360 degree video summarization.
- **Vision & Language, Visual QA.** Won three competition in LSMDC 2016,2017 challenge (Multichoice QA, Movie Retrieval and Fill in the Blank). For video QA, I have experience of leading the industry project on movieQA. Additionally, our team collected TGIF-QA dataset and develop state of the art method for video QA, which is presented in CVPR 2017 (spotlight). I have interests in Multi-modal intelligence, fusing vision, audio and language capabilities.
- **Video saliency prediction.** Developed recurrent saliency/human gaze prediction for video. Our work is presented in CVPR 2017. Currently I am developing a learning model that models the biological response of the person who viewed the video.
- **Video story generation.** Won competitions in LSMDC 2019 challenge. ("Multi-Sentence Description", "Fill-in the Characters"). Developed automatic descriptive video service(DVS) generation system for visually impaired people.
